SUMMARY

Backend-focused Full Stack Developer with 3 years of professional software development experience building real-world government and business applications. **Strong hands-on experience with Node.js, NestJS, TypeScript, REST APIs, PostgreSQL, MySQL, Prisma, and Express.js.**

Experienced in developing modular backend systems, authentication and authorization, JWT, RBAC, secure HTTP-only cookies, input validation, Redis caching, Docker, unit and integration testing, and external API integrations. Built systems involving government services, payments, identity verification, e-invoicing, appointment management, inventory, and transactional business workflows.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Soft Valley

May 2024 – present

Addis Abeba

- Developed and maintained real-world government and business applications with responsibilities across backend APIs, database design, authentication, business logic, external integrations, and frontend development.

Government Service Portal — Laravel, Next.js, TypeScript, MySQL

- Built an e-Government Service Portal serving many users across 140+ digital services.
- Processed 20K+ applications with 97% reported citizen satisfaction.
- Implemented role-based access control (RBAC) for government staff and customer workflows.
- Integrated Fayda National ID, document management, and payment systems.
- Implemented QR-verified digital certificates and multilingual support.

Shaggar City Traffic Management System — Laravel, Next.js, MySQL

- Developed a traffic management platform serving 450+ government users across 12 subcities.
- Built backend workflows processing 500K+ traffic charges.
- Integrated TeleBirr payment services and automated late-fee calculation.
- Developed REST APIs consumed by the Oromia Regional Government Transport Agency.
- Implemented accident reporting, charge management, wanted/missing-person tracking, and analytics.
- Supported a system recording ETB 800M+ in revenue.

One Stop Service Center QMS (Mesob) — Laravel, MySQL, REST API

- Developed a queue management system deployed across 6+ cities.
- Built backend workflows processing 200K+ tokens.
- Supported approximately 2K citizens daily.
- Developed self-service kiosk, real-time display, reporting, feedback, and multilingual functionality.

SKILLS

Backend

Node.js, NestJS, Express.js, Fastify, TypeScript, REST APIs

Authentication & Security

JWT, RBAC, HTTP-only Cookies, OTP, CSRF Protection, Rate Limiting, Helmet, Argon2, Input Validation

Testing & API Tools

Jest, Unit Testing, Integration Testing, Postman, Swagger/OpenAPI

Databases & ORM

PostgreSQL, MySQL, MongoDB, Prisma ORM

Caching & DevOps

Redis, Docker, Docker Compose, Git

Frontend

React.js, Next.js, Tailwind CSS, Bootstrap

PROJECTS

Multi-Tenant SaaS Appointment Platform

NestJS 11 | TypeScript | Prisma 7 | PostgreSQL | Redis

- Developed modular backend features using **NestJS, Prisma, and PostgreSQL**.
- Implemented **JWT authentication, HTTP-only cookies, SMS OTP, and multi-level RBAC**.
- Implemented **CSRF protection, rate limiting, and Redis caching**.
- Designed backend modules and APIs documented with **Swagger/OpenAPI**.

ERP / Inventory & POS System

NestJS 11 | TypeScript | Prisma | PostgreSQL | Docker

- Built a modular ERP backend using **NestJS, Prisma, and PostgreSQL**.
- Implemented **JWT authentication, HTTP-only cookies, RBAC, and Argon2**.
- Developed inventory and transactional sales workflows with stock validation.
- Used **Docker Compose** for local PostgreSQL development.

Government E-Invoice Integration Engine

Node.js | TypeScript | Fastify 5 | Prisma 7 | PostgreSQL | Zod

- Developed REST APIs integrating business systems with **Ethiopian Ministry of Revenue e-invoicing APIs**.
- Implemented authentication, token refresh, invoice verification, and receipt registration.
- Built validation and signing workflows using **Zod and cryptographic services**.
- Developed **unit and integration tests** for authentication, signing, and receipt workflows.

Government Rental & Appointment Platform

Node.js | TypeScript | Express | Prisma | PostgreSQL | Next.js

- Developed REST APIs and business workflows using **Node.js, Express, Prisma, and PostgreSQL**.
- Implemented **JWT, OTP, RBAC, cookies, and secure authentication**.
- Integrated **TeleBirr payment and Fayda identity verification** workflows.
- Implemented background jobs, payment expiry, reminders, and backend security controls.

EDUCATION

BSc in Software Engineering

Wollo University — Kombolcha Institute of Technology (KIOT)
3.83

09/2018 – 2023

Addis Abeba
