

Wondwosen Endale Gedfe

Addis Abeba

0955143592 | endalewondwosen@gmail.com

Objective

Full Stack Developer with 3 years of experience in full-stack web development. Proficient in React, Node.js, and modern frameworks, with demonstrated ability to integrate AI features into applications. Looking to apply technical skills and continue growth in AI-Augmented development.

Experience

- Soft Valley** May 2024 - March 2026
Full stack Developer
Built e-Government Service Portal serving 4k+ users, processing 4k+ applications across 140+ services with 97% satisfaction rate; implemented RBAC, digital certificates with QR verification, and multi-language support

Developed Shaggar City Traffic Management System serving across 12 subcities with 450+ traffic users, recording 400k+ traffic charges and generating ETB 500M+ in revenue; integrated TeleBirr payment gateways with automated late-fee calculation

Created One Stop Service Center QMS (Mesob) deployed in 6+ cities, processing 70k+ tokens with 85.7% completion rate and 500+ daily citizens; built self-service kiosks, real-time TV displays

Education

- Wollo univerisity,Kombolcha Institute of Techninology(KIOT)** 2018-2023
Bachelor of Science in Software Engineering
3.83

Skills

- Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Bootstrap
- Backend: Node.js, Express.js, Nest.js, Laravel, REST APIs
- Nest.js, Laravel, REST APIs Database: PostgreSQL, MySQL, MongoDB, Prisma ORM
- MongoDB, Prisma ORM DevOps & Tools: Git, Docker, Jest, Vite, npm/yarn
- State Management: Redux Toolkit, Zustand, React Context
- LANGUAGES: English (Advanced) | Amharic (Native)

Projects

- Government Service Portal | Laravel, Next.js, MySQL, TypeScript**
 - Delivered platform serving 4k+ users in Shaggar city with 140+ digitized services
 - Processed 4k+ applications with 97% citizen satisfaction rate
 - Integrated Fayda National ID, DMS, and payment systems with QR-verified digital certificates
 - Implemented RBAC, real-time chat (Pusher), and multi-language support (EN/Amharic/Afaan Oromo)
- Shaggar City Traffic Management System | Laravel, Next.js, MySQL**
 - Built platform for 450+ government users across 12 subcities of Shaggar; recorded 400k+ traffic charges

- Generated ETB 500M+ in revenue through TeleBirr integration with automated late-fee calculation
- Developed public REST API consumed by Oromia Regional Government Transport Agency
- Features: wanted/missing persons tracking, accident reporting, and comprehensive analytics.
- **One Stop Service Center QMS (Mesob) | Laravel, MySQL, REST API**
 - Deployed queue system in 6+ cities (Jimma, Bishoftu, Shashemene, Agaro); serves 500+ citizens daily
 - Processed 70k+ tokens with 85.7% completion rate.
 - Built self-service kiosks, real-time TV displays reducing wait times
 - Includes citizen feedback system and 6 report types with multi-language support
- **MORE PROJECTS**

Visit my portfolio for additional projects (NexaERP, QR Menu System, AI platforms):
