Objective

Full Stack Developer with 2 years of experience... seeking a role where I can apply my skills in building scalable AI-enhanced applications. Collaborative team player focused on delivering measurable business impact through high-quality, testable code.

Experience

- Soft Valley** May 20/2024 - Mar 1/2026
Full stack Developer
Developed full-stack web applications for government clients, including e-service portals for Adama, Shagger, and Dire Dawa cities, a traffic management system for Shagger city, Mesob(one stop service center) QMS and a project management platform. Built responsive frontends with React and Next.js, implemented backend services using Laravel and Node.js, and managed MySQL databases. Collaborated with stakeholders to gather requirements and delivered scalable solutions that digitized government services for citizens.

Education

- Wollo univeristy,Kombolcha Institute of Techninology(KIOT)** 2018-2023
Bachelor of Science in Software Engineering
3.83

Skills

- frontend :- css, html, javascript, php.Framework :- react js, next js bootstrap and tailwind css, typescript
- Interpersonal skills :-Effective communication for liaising with technical and non-technical stakeholders.Teamwork and collaboration with IT and operations teams.Strong organizational skills and the ability to prioritize tasks.
- Languages Skill:Amaharic - Native,English - Advanced
- Backend Teck stack:- laravel, nodejs with express amd Nest js,
- State managment context api, and other external library such as Redux and zustand
- Database Technology:- MYSQL, PostgreSQL, MongoDB

Projects

- **E-service portal**
I have developed E-eservice platform for different cities such as shaggar , Shashemen, Dire Dawa, Adama cities. eservice system is an electronic platform that that provide online government service for the citizens.
- **Shagger city traffic managment systrm**
The system allow traffic police and traffic controller to register traffic penalty or traffic charges on drivers.
The system allows crime controller to register traffic accident.
The system allows drivers to complian.
The system allows traffic officer and transport officer to view report and other functionality.

- **Enterprise Task Management and Collaboration system**

A high-performance, full-stack Task Management System designed to streamline team workflows and project lifecycles. The application features a robust administrative backend and a dynamic, responsive frontend, providing enterprise-level security and real-time data visualization.

- **ElectroCart – AI-Powered Premium E-Commerce Platform**

Overview A state-of-the-art e-commerce storefront for premium electronics, built with Next.js and React. The platform differentiates itself by integrating cutting-edge Generative AI (Google Gemini API) to deliver an intelligent, personalized shopping experience that goes beyond traditional static stores.

- **MyBlog – AI-Augmented Full-Stack Blogging Platform**

Overview A sophisticated, full-stack content management system (CMS) built with the MERN Stack (MongoDB, Express, React, Node.js) and integrated with Google Gemini AI. The platform is designed to revolutionize content creation by automating the heavy lifting of writing, SEO, and accessibility through advanced LLM integrations.

- **NexaERP – Modular Enterprise Resource Planning (ERP) System**

Overview A comprehensive, enterprise-grade ERP solution designed to centralize business operations, including inventory management, sales tracking, and financial analytics. Built with a focus on high availability and strict data integrity, the system utilizes a Modular Monolith architecture to ensure scalability and ease of maintenance.

- **One-Stop Service Center (Mesob) QMS**

Designed and developed a digital Queue Management System (QMS) to streamline customer flow and service delivery at Ethiopia's pioneering Mesob One-Stop Service Center. The system digitizes the queuing process for 41+ government services, replacing manual lines with an efficient, automated solution to reduce wait times and improve the overall citizen experience.
